B E S P O K E

It's fine art.

It takes a true artisan to lovingly craft the comfort and beauty into each piece of Moran furniture.

Every Moran is an individual creation, handmade for you by some of the world's finest upholstery specialists. Owning bespoke handcrafted furniture continues to be a sought after trend.

There is just no comparison between mass-produced vs. handcrafted furniture. The innovation, quality and attention to detail shine through in the way the raw materials are worked, as makers are intrinsically connected to the process of individual creation.

For decades Moran Furniture has been welcomed into homes of Australian families; many customers claiming their Moran furniture has retained its quality for so long they are a part of the family too as they are handed down from generation to generation. To this day, Moran continues on this trajectory, creating bespoke, high quality furniture to suit Australian lifestyles.

Each piece is still individually built by hand, from the inside out using the finest materials and best-practice crafts rather than mass production techniques. The specialised traditional techniques used to build Moran Furniture have been entrusted to a select number of artisans embracing Moran's best-practice standards helping to ensure these skills are able to be continued on for future generations and to meet the continued demand for handcrafted furniture worldwide.

While the corporate ethos is modern, Moran Furniture continues to uphold genuine traditional standards like quality hand-craftsmanship, long-lasting comfort and value for money, the result of which ensures every Moran furniture piece is a statement in uncompromised luxury.

Choosing handmade furniture from Moran Furniture helps support our dedicated team positioned locally and internationally to continue to deliver quality and craftsmanship with inspiring designs to create beautiful, timeless interiors.

Handcrafted to perfection.

DAVID JONES EXCLUSIVE

O U R S T O R Y

Moran has had a rich 60 plus year history. From humble beginnings, Moran Furniture grew into what is now arguably Australia's most long-standing and recognized premium upholstered furniture manufacturer.

John Moran, the founder of the brand, pioneered many innovations both within the company and industry. All the while, he never wavered from his philosophy of delivering high quality, comfort and value. This vision has developed into a truly international business, continuing to make some of the very best furniture in the world.

When John Moran rolled out his first upholstered piece of furniture, the Michigan sofa, he probably never expected that 60 years later his name would become an iconic brand name in Australian furniture.

Today hundreds of thousands of Australians live with a Moran. In fact, Moran has produced over one million pieces of furniture.

John's great belief in his product, inspired vision and value proposition, he has shared first hand and in imparting his knowledge with others over the years, has had a profound effect on many who speak fondly of their interactions with him and his passion for the industry.

John's belief in his hand made furniture and charisma would soon make Moran Furniture what people wanted as a status symbol in their home.

In 2002 John Moran embarked on a manufacturing partnership in a state of the art facility in Shanghai. John's approach to business was innovative and his forward thinking ensured the stability of the business to maintain a quality, and value offering to Australians.

Unfortunately 2003 saw the sad passing of John Moran, but his passion and commitment to the business he built still continues to this day.

Moran Furniture has a team of dedicated staff, expertly trained in their fields, some whom have been with the company for over twenty years.

The collective passion and commitment continues today, staying true to John's vision, which keeps the company going from strength to strength.

Our history is important to us. It reminds us of the hard work, dedication and pride we have in the product we offer to Australians. We pass this on to you through delivering good old fashioned service and dedication in positively contributing to Australian design, and keeping handcrafting techniques of manufacturing alive.

So when you purchase a Moran product you can be confident in our slogan.

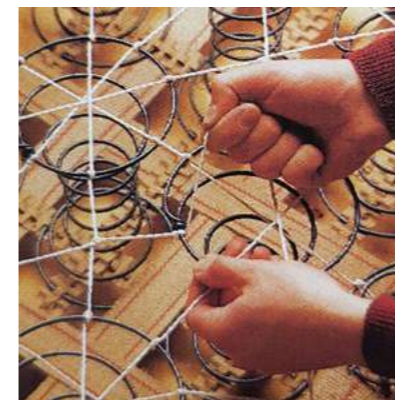

Relax, it's Moran, Relax in Style.

OUR CONSTRUCTION

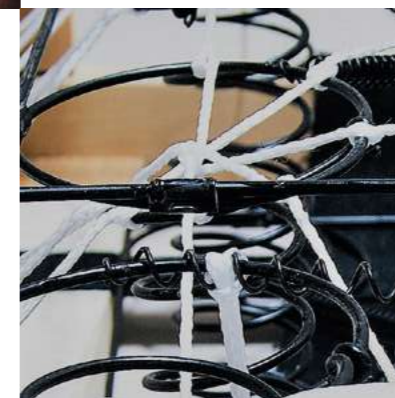

An investment in handmade luxury.

Moran's underlying quality begins with a structurally correct frame, strength and integrity. Its high load-bearing capacity ensures lasting support and durability that is not always evident in lighter weight furniture.

8-WAY HAND TIED SPRUNG SEAT BASE & EDGE

Traditional construction methods using eight-way hand-tied cushion support; this is accepted that the finest and most comfortable seat has an eight-way hand-tied hourglass spring system, providing independent support for each person. Available on selected models.

CONTEMPORARY SPRUNG SEAT BASE

Contemporary non-sag springs; for those models that require a more slimline construction for cushion support seat and back with built-in lumbar support. This innovation in tension and suspension control provides resiliency and performance that extends furniture life. Standard as applicable to each model.

INTEGRATED LUMBAR SUPPORT

Integrated lumbar support; tempered steel springs and sculptured padded backrests are individually adapted to each model to provide healthy lower back support eliminating seated spine pressure. Standard as applicable to each model.

This ultimate in seating construction was previously only available in the world's most prestigious furniture; Moran puts it within everyone's reach.

Moran believes that good furniture should be built by hand from the inside out, resulting in truly beautiful upholstered furniture that provides the ultimate in supportive comfort and exquisite level of refined tailoring that will stand the test of time.

MORAN BRITNEY - SUITE

Everyone deserves well-made furniture that is good for your body.

Make your house a home, one that invites you to relax and enjoy your life in the best possible way every day. There is no place more important than home and our guiding belief that 'everyone deserves well-made furniture that is good for your body' is why 'comfort' is what Moran is all about.

Moran comfort gives the level of relaxation that is essential to good health and well-being and underpins every design that we make without compromising on style.

For your body to be truly comfortable your sofa or chair has to be more than soft. A lot goes into making a seat that offers support in such a manner that the initial comfort continues to provide long-lasting comfort.

Moran furniture is purposely designed to position your entire body in as weightless a state as possible – gently distributing weight to alleviate pressure points so your muscles can truly relax from head-to-toe, rather than your body seeking compromises, by repositioning itself to find relief.

Comfort is often invisible. This is especially so with upholstered furniture. The anatomy of Moran Furniture reveals the finer points of the materials and construction that combine to give you the lifelong comfort that is synonymous with the Moran brand.

When you are sitting in well-constructed furniture, your body will thank you. In fact the longer you sit, the more relaxed and rejuvenated you become.

Our Seat Inserts

SPRINGCELL PLUS FEATHER WRAP

A SpringCell Plus Feather Wrap insert offers the stability and support of a SpringCell seat insert combined with the added luxury of a feather quilt layer that you can sink into.

A Feather Wrap may be double or single sided as applicable to the seat depth and look applicable for the individual model. In both cases a Feather wrap will ultimately change the look of the cushion to a softer, looser appearance.

This style is for those who prefer softer cushioning and who embrace a more unstructured style on the surface, but still appreciate the body correct support of the underlying SpringCell core.

As is the nature of a feather wrap, weight on the seat will leave a surface impression that gives it its distinctive slouchy, relaxed style.

A little periodic plumping of the feather layer by dropping the cushions face down from waist height to the ground will go a long way to help keep these cushions looking their best.

The quality Japara cotton quilt covers housing the feathers are zippered in place around the core offering better distribution and ease of rejuvenation and replacement for the life of your sofa.

SPRINGCELL SEAT

A SpringCell seat insert is constructed with tempered steel springs encased in a sandwich of Dunlop Enduro foam.

Individually wrapped 2mm compressed spring coils are hand-packed within the load bearing area of the seat. The surrounding foam is then glued together to create a stable internal chamber for the coils to respond to the pressure placed upon them.

A FibreSoft wrap around this core further enhances a more evenly rounded and aesthetically pleasing cushion shape, whilst also preventing loose or worn areas from forming from within.

The standard SpringCell design has been Moran's Signature in seating support and comfort for the past 30 years as it continues to provide superior comfort and support unlike any other cushion core.

Customers who are predisposed to any back complaints are directed to this most supportive seat option.

FEATHER & FIBRE

A Feather & Fibre insert is constructed with a mix of 50% feathers and 50% man-made fibre.

Feathers are known to be the softest and most luxurious filling available. This feather & fibre mix provides a distinctive light lofty appearance, providing the ultimate casual yet sumptuous lived-in look. This look appeals to those who like to sink into their cushions.

As feathers are a natural product the light and unstructured look requires regular plumping by dropping the cushions face down from waist height to the ground to redistribute the feathers.

A little daily care will allow air to flow between the fibre mix to free the feathers from crushing to maintain its inviting comfy plump look for the greatest length of time. Naturally however, through normal use, compression will still occur during the life of your sofa.

FOAM CORE PLUS FEATHER WRAP

A Foam Core Plus Feather Wrap option consists of a high resilience Dunlop foam core surrounded by the softness of a feather wrap which fosters the relaxed lived-in appearance.

Providing a medium level of support this core provides short-term comfort and resilience than its SpringCell counterpart. Aesthetically, however, it does present a flatter rectangular shaped cushion due to the foam component and softened by the feather wrap offers a pleasing visual result.

As is the nature of a feather wrap, weight on the seat will leave a surface impression that gives it its distinctive slouchy, relaxed style.

A little periodic plumping of the feather layer by dropping the cushions face down from waist height to the ground will go a long way to help keep these cushions looking their best.

Our Back Inserts

FIBRESOFT FILL

A 100% FibreSoft Fill back is a manufactured foam filling often used for its cloud like cushion feel, that is most appealing in back cushions when couple with a supportive frame construction.

As with all man made products it is extremely durable. This option will provide many years of back support and by far is the most resilient of all back insert options.

FEATHER FILL

Feather Filled Scatter Backs are constructed with 100% feathers. Feathers are known to be the softest and most luxurious filling of all inserts, they provide a relaxed, comfortable, lived-in appearance and definitely appeal to those customers who like to sink into their cushions.

As a consequence of the feathers being a natural product, the feathers do not maintain an exact symmetrical shape and regular plumping of the insert is required to redistribute the feathers evenly and to inhibit the feathers clumping.

It is recommended that the feather/fibre insert is plumped up daily to maintain its inviting comfy lived-in look.

SPRINGCELL BACK

A Springcell back is constructed as a sandwich of Dunlop foam encapsulating 2mm springs within the load bearing area of the seat. The surrounding foam is glued together with the springs covertly placed in individual calico bags within the centre of the construction. This feature is by far the most supportive of all seat inserts, it is further enhanced with a fibresoft wrap around the foam.

Customers who are predisposed to any back complaints are directed to this most supportive seat option. The standard springcell has been the Moran signature in seating support and comfort for over the past 30 years.

All our inserts are designed with replenishment and replacement in mind, extending the natural life of your loved Moran sofa for many more years of enjoyment.

YOUR OPTIONS

Redefine Your Chosen Style of Furniture and Configuration with these Tailor-made finishing options.

MORAN FABRICS

Fabric can create an inviting and tactile experience within the home. With the breadth of colour options and textures available, as well as glorious prints to consider, the world is your oyster when it comes to creating the most memorable looks imaginable in interiors with fabric on upholstered furniture.

Our Moran Fabric selection is a refined collection; representing a considered and consolidated range of highly desirable looks and colours from trusted mills and leading fabric houses, ensuring quality finishing, fashionability, exceptional value and lasting enjoyment.

TIMBER COLORS

Co-ordinated timber colour throughout a home can create the ultimate high-end look. Our timber colour range offers a comprehensive selection of fashionable, neutral based colours to tie back seamlessly with other popular classic and contemporary timber furniture and finishes, to make achieving a coordinated look you desire, a breeze.

Furniture Catalogue

This beautiful collection of fine, Australian designed furniture, is amongst the most comfortable you will find anywhere in the world.

We hope you enjoy the breadth of styles and configuration options we offer as we endeavour to help you create your dream home.

Home is and always will be the nucleus of our individual universe; where we should feel the most at ease. Certainly a home is the most endearing when it reflects our personal tastes and way of life. So whatever style attracts you in this book, be excited by the possibilities. Express your personal style and be secure in the knowledge that we will ensure that your investment is easy on the eye and especially so on your body.

In our 60 plus year history, our range has and will continue to evolve, as a reflection of the tastes and trends important to Australians, while the quality and service support we offer is consistently second to none.

We invite you to share in the experience of why so many Australians choose Moran Furniture. At the end of the day you deserve to just sit back and relax.

Relax in Style, Moran

O U R S E R V I C E S

You sit in it, we stand by it.

Our Melbourne based Sales and Aftersales team is here to help you every step of the way.

Our Sales team can look after you throughout your selection and ordering process and can offer you the best advice on caring for your furniture.

Our Aftersales department will look after your investment in comfort from the day of delivery should the need arise.

A ten-year frame warranty from date of purchase applies to each new order.

Moran also provides the option of replacing the Seat and Back "Inserts" in the models that have zippered removable covers. This is an added benefit to the consumer as the furniture never needs to be replaced just rejuvenated. The springcell seat and fibrefill back inserts can be replaced to return your furniture to its original standard of comfort and support, other seat and back options can also be ordered.

All replacement inserts carry a 5 year warranty.

Please log on to our website www.moranfurniture.com.au for further details on this service or contact our After Sales Department on **03 9590 4800**.
